

HEAD START

Regional T/TA Network

Safe Facilities

Tammy Wickstrom & Racquel Martinez

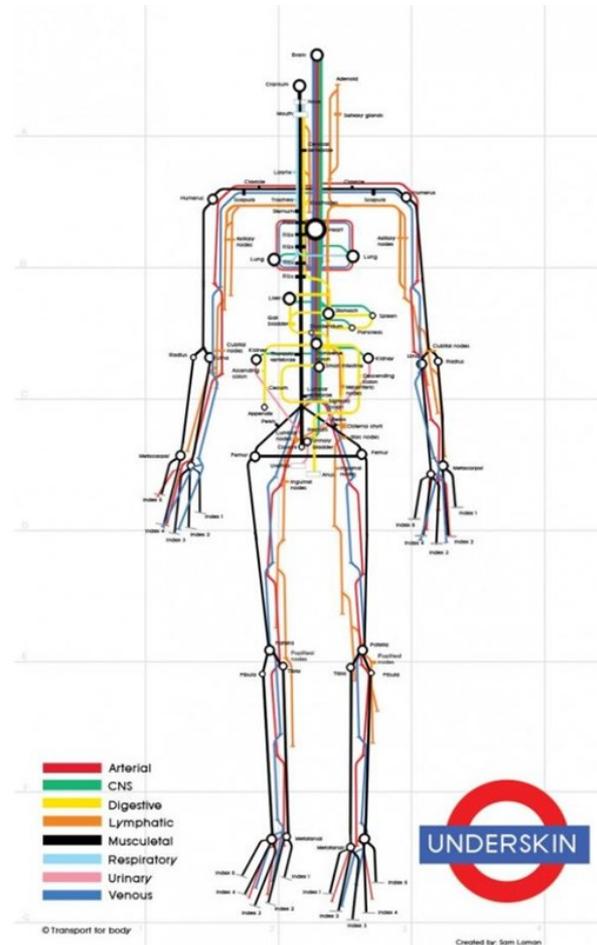

Grantee Specialists OHS Region XI AIAN TTA Network

Outcomes

- Recognize Head Start Performance Standards (HSPPS) related to safety and facilities.
- Identify effective strategies that support directors and managers to move from a “reactive” to “proactive” safety approach.
- Develop a plan for implementing a Culture of Safety (COS) in Head Start and Early Head Start.
- Use and share comprehensive strategies that are informed by program data to promote injury prevention.

Systems

Head Start Management Wheel

- Five-Year Project Period

Safety and Injury Prevention Definitions

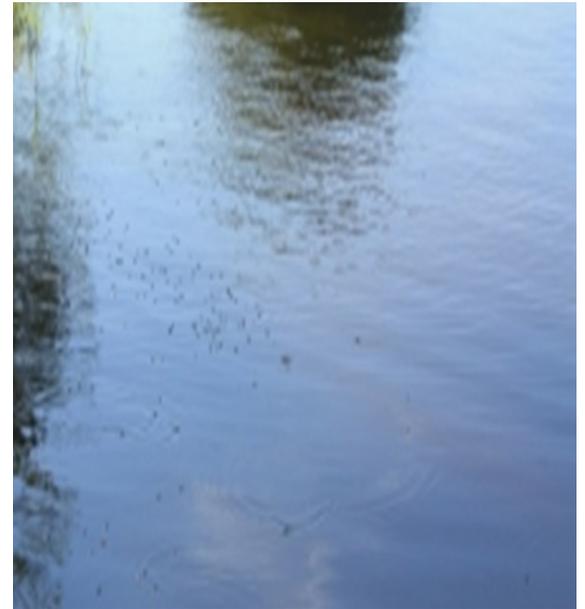

Injury is,

Damage to a person in a physical sense.
Injuries occur when interactions occur between
a person and...

Elements

Objects

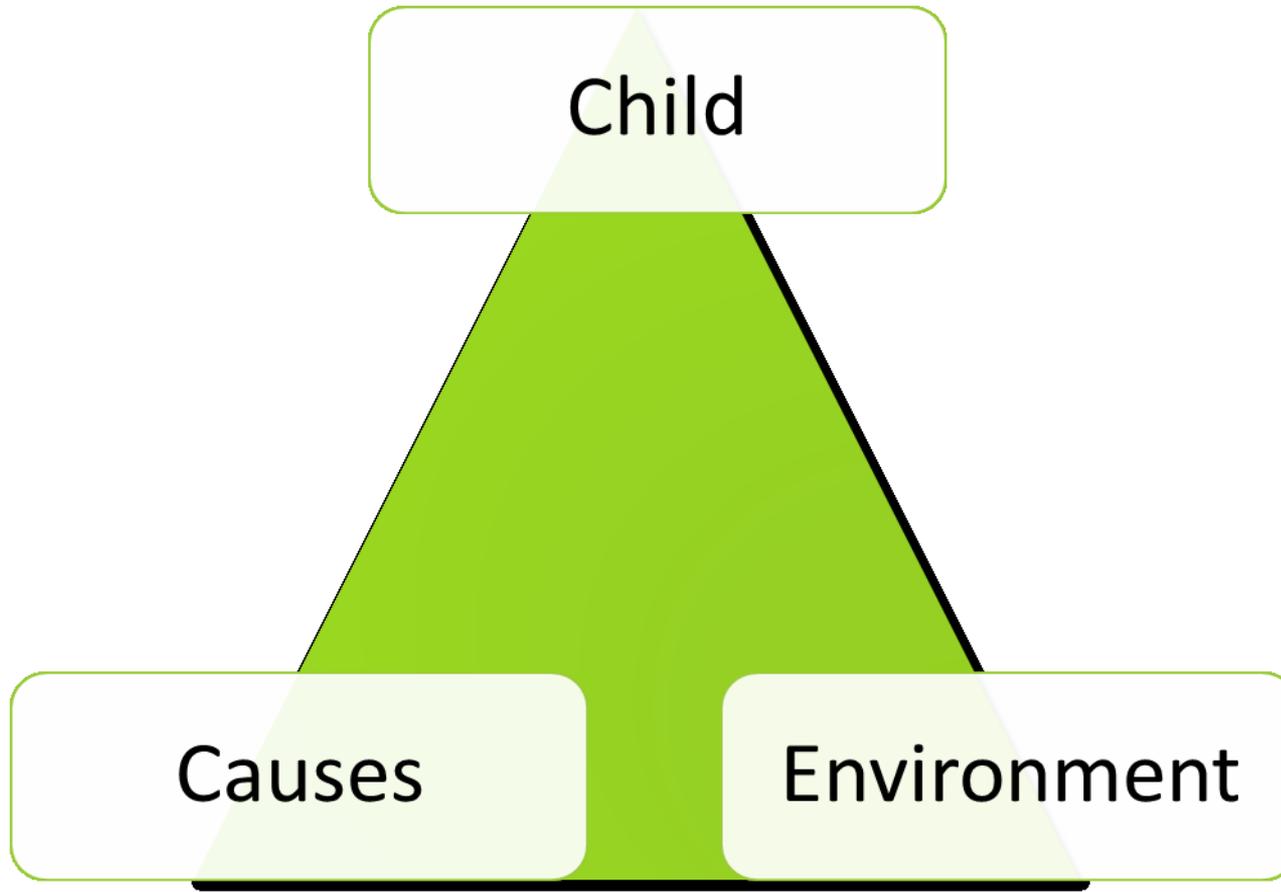

Animals/Insects

Chemicals

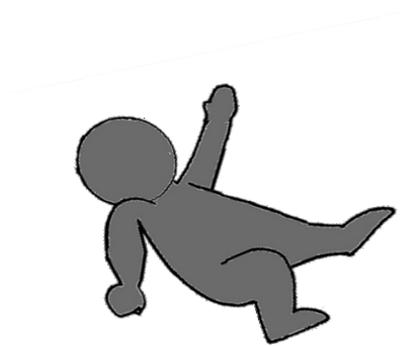

Injury Triangle₈

Unintentional and Intentional Injury⁸

“Unintentional Injury
results from an
unintended incident”

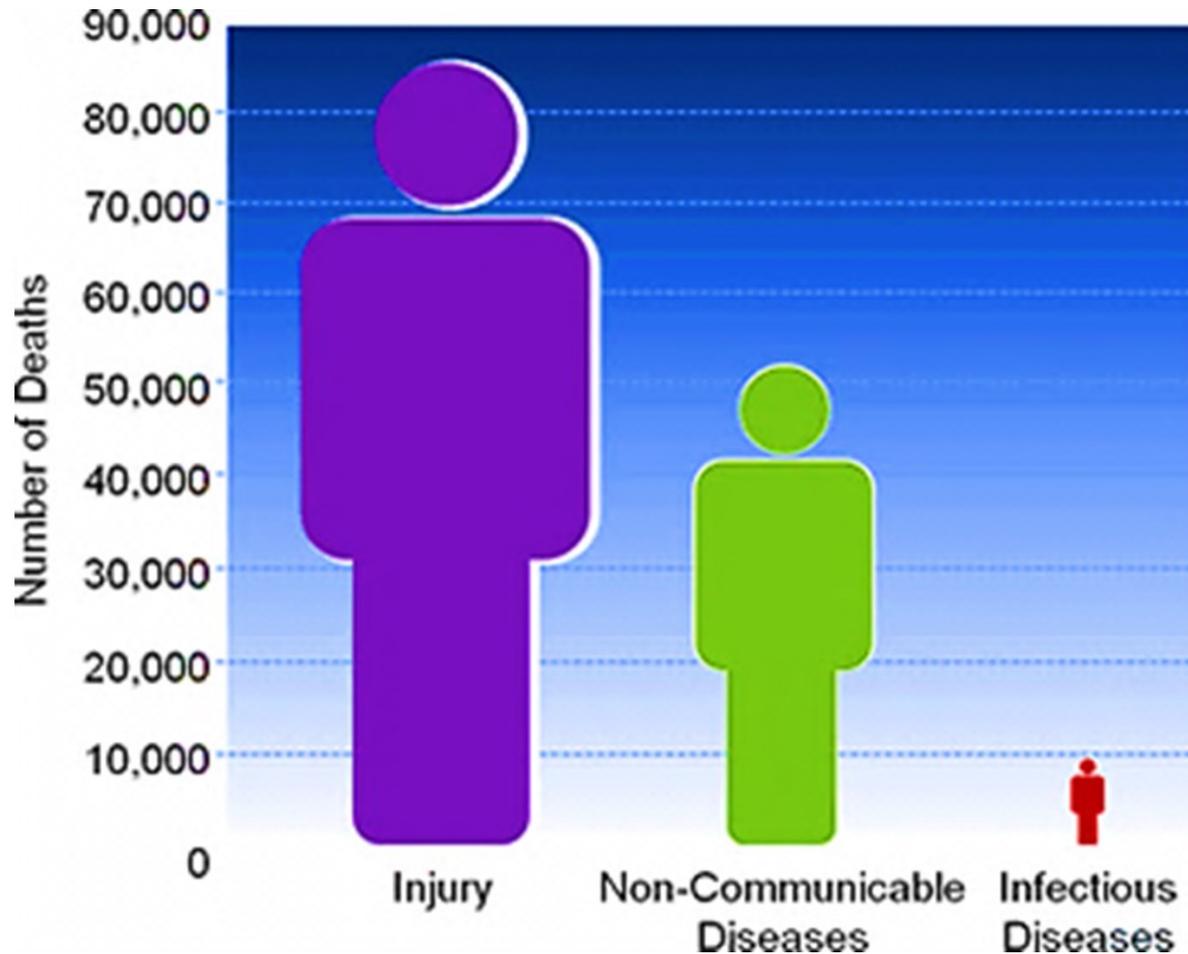

“Intentional Injuries are
caused by one person
inflicting harm on another
person, such as one child
[pushing] another child or
an adult physically
abusing a child”

Pair and Share Activity

- Describe an example of
 - Unintentional injury
 - Intentional injury
- What data did you use to identify each situation?

What We Know About Injuries^{1,2,3,4,5,6}

Keep Environments Safe and Secure

- Programs create, monitor, and maintain hazard-free spaces
- Children learn through exploration and experimentation
- Removing hazards from the environment increases children's opportunities to grow in all developmental domains
- Staff who identify risks and remove hazards prevent injuries before they happen, allowing children to safely engage in learning

Steps to Implement: Safe and Secure Environments

- Conduct a safety check
- Identify and prioritize hazards
- Report, repair and maintain facilities & equipment
- Obtain safety equipment
- Educate everyone about maintenance and monitoring

FACILITIES: Emergencies, Medications, Equipment and Furnishings

Emergencies

	Never	Sometimes	Usually	Always	Not Applicable	No Opportunity
1. A sign-in/sign-out system tracks who (other than children) enters and exits the facility. It includes name, contact number, purpose of visit (for example, parent/guardian, vendor, guest, consultant) and time in and out. (Std. 9.2.4.7)	0	0	0	0	0	0
NOTES						
2. Phone numbers to report child abuse and neglect (Child Protective Services) are clearly posted where any adult can easily see them. (Std. 3.4.4.1)	0	0	0	0	0	0
NOTES						
3. Phone number for the Poison Center is posted where it can be seen in an emergency (for example, next to the phone). (Stds. 5.2.9.1) 5.2.9.2)	0	0	0	0	0	0
NOTES						
4. Fire extinguishers are inspected annually. Check date on fire extinguisher tag. (Std. 5.11.3)	0	0	0	0	0	0
NOTES						
5. Each building or structure has at least two unobstructed exits leading to an open space at the ground floor. (Std. 5.14.1)	0	0	0	0	0	0
NOTES						
6. A smoke detector system or alarm in working order is in each room or place where children spend time. (Std. 5.2.5.1)	0	0	0	0	0	0
NOTES						
7. Carbon monoxide detectors are outside of sleeping areas. (Std. 5.2.9.5)	0	0	0	0	NA	0
NOTES						
8. *First aid supplies are well-stocked in each location where children spend time. (Std. 5.6.0.1)	0	0	0	0	0	0
NOTES						
9. *First aid supplies are kept in a closed container, cabinet or drawer that is labeled. They are stored out of children's reach and within easy reach of staff. (Std. 5.6.0.1)	0	0	0	0	0	0
NOTES						
10. *A well-stocked first aid kit is ready for staff to take along when they leave the facility with children (for example, when going on a walk, a field trip or to another location). (Std. 5.6.0.1)	0	0	0	0	NA	0

Classroom

Checklist question

- Equipment and play areas do not have flaking paint, rusty or loose parts.....

Findings

- Bookshelf had peeling paint and splintered wood

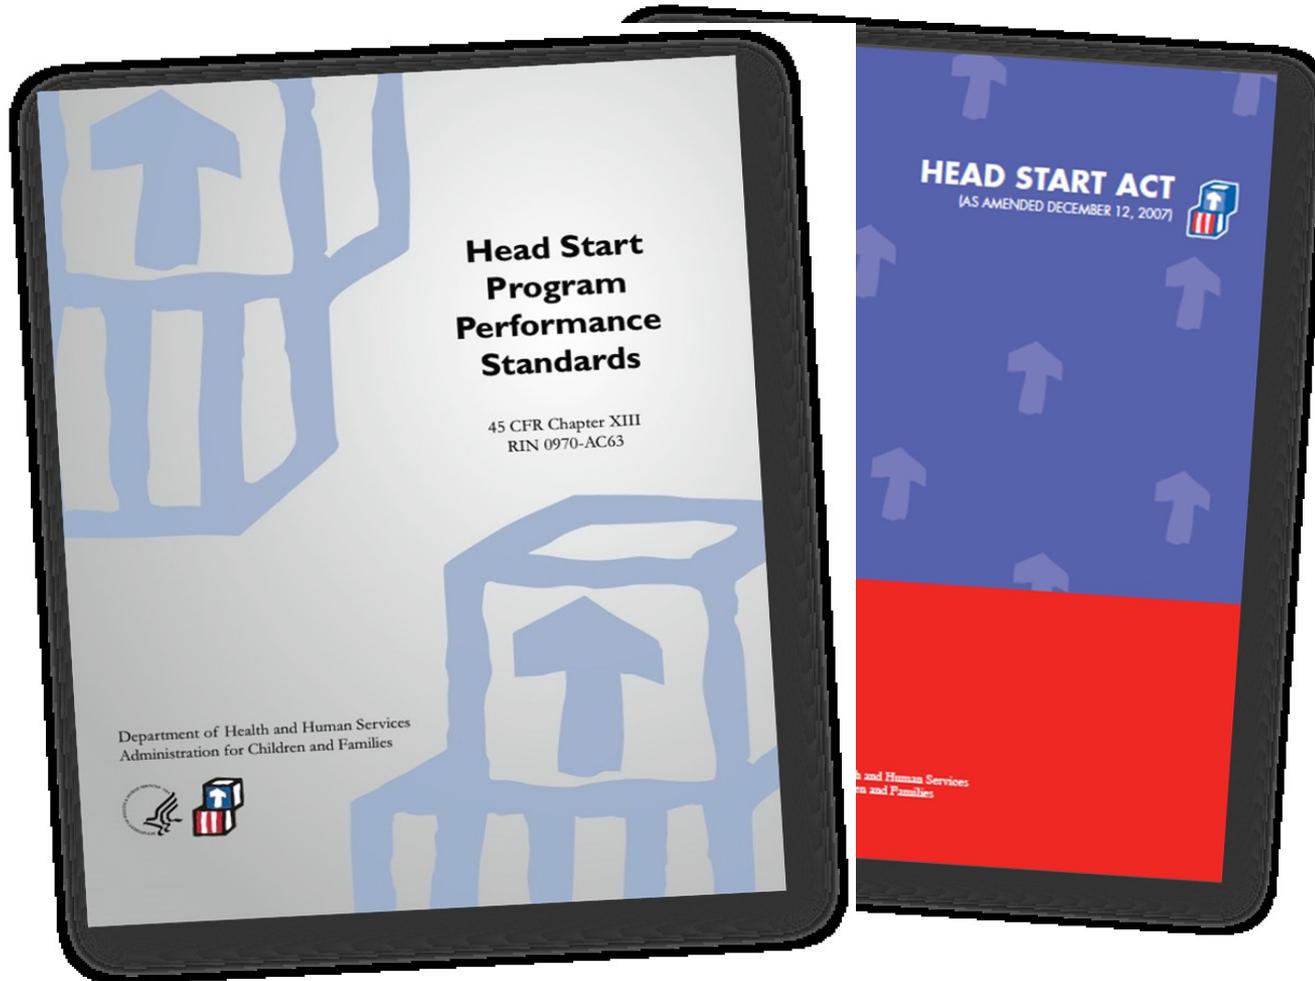

Example Checklist Questions

- If this was a finding on a routine check of the environment, what would the next step be after fixing/addressing the immediate problem?
- Which Head Start Management Systems may need to be strengthened?

Discussion questions

- The grantee did not ensure toilets and handwashing facilities were clean and in good repair. The Health and Safety Checklist contained a section on the conditions of bathrooms, but there was nothing noted about the issues identified in the girls' bathroom.
- The grantee did not ensure smoke detectors were tested regularly. The condition was identified on the Health and Safety Checklist.
- Health and Safety Checklists were primarily conducted by parents who were not properly trained. The Playground Checklist was missing monitoring for hazardous conditions.

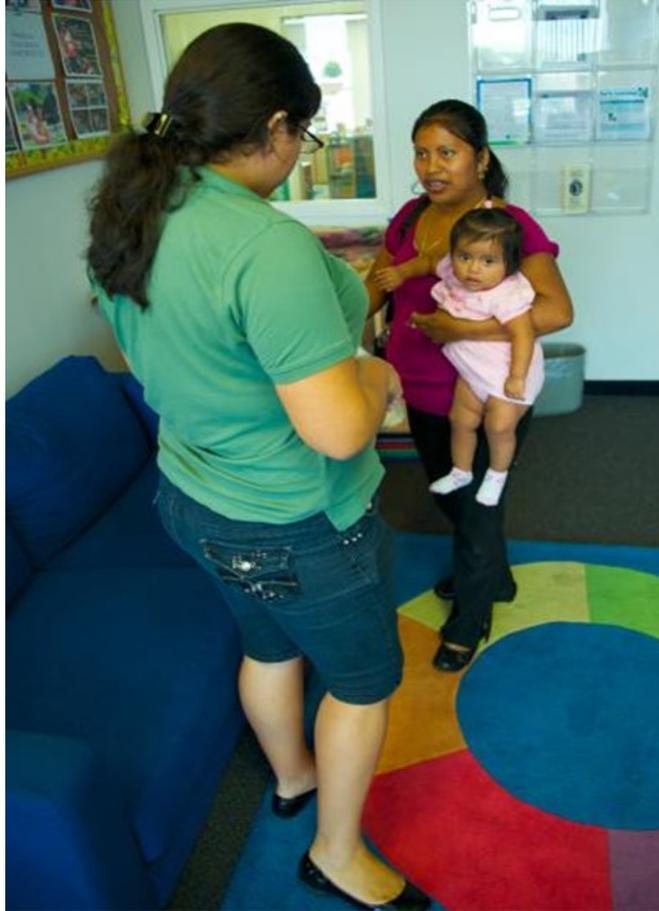

Head Start Act and Performance Standards

1302.47-Safety Practices

- (a) A program must establish, train staff on, implement, and enforce a system of health and safety practices that ensure children are kept safe at all times. A program should consult Caring for our Children Basics, available at http://www.acf.hhs.gov/sites/default/files/e cd/caring_for_our_children_basics.pdf, for additional information to develop and implement adequate safety policies and practices described in this part.

1302.47-Safety Practices

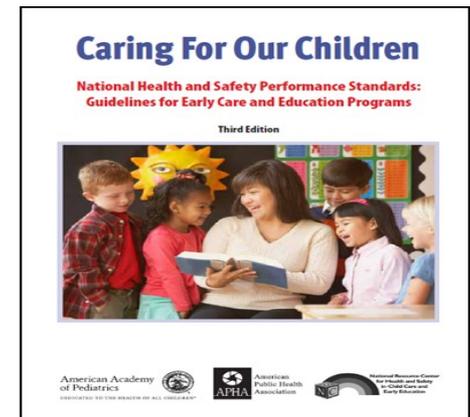

- Allows flexibility to adjust policies and procedures
- Health and safety requirements
 - Facilities
 - Equipment
 - Materials
 - Background checks
 - Safety training
 - Safety practices
 - Administrative safety procedures
 - Disaster preparedness plans

Caring for Our children Basics(CFOC) 3rd Ed.

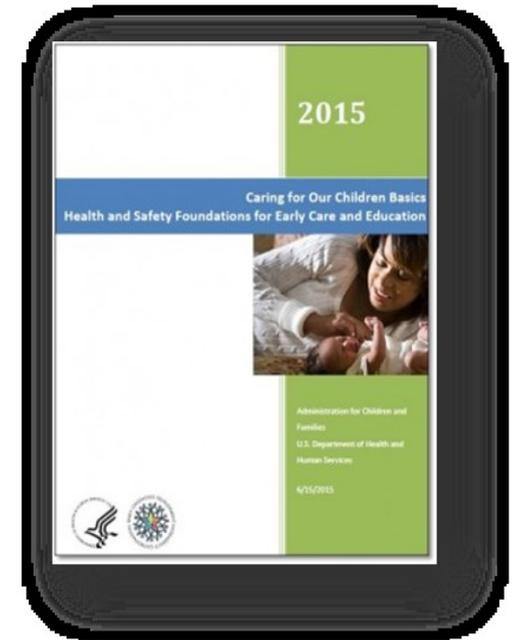

- *Caring for Our Children, 3rd Edition*
- **National Health and Safety Performance Standards for Early Care and Education Programs**
 - 3rd edition Revision completed and published in June 2011
 - 4-year revision process
 - 10 Technical Panels - 85 panel members - Content Experts from AAP, APHA, and subject specialists

<http://nrckids.org/CFOC3>

Caring for Our Children Basics

- Provide guidance on **voluntary**, basic, minimum health and safety standards for early care and education programs
- Reduce conflicts and redundancies found in federal program standards that impact early childhood settings
- Enhance state child care licensing practices and QRIS
- Improve efficiencies in monitoring systems
- Create consistent **floor** across Head Start, child care, and pre-K from which programs would aspire/move to higher quality and upon which parents can rely

Preventing Injuries-the 4 “E”s

- Education (knowledge and skills)
1302.47(b)(4)
- Environment (social and physical)
1302.47(b)(1)
- Enforcement (policy and/or procedures)
1302.47(a), 1302.47(c), 1302.47(b)(7)
- Evaluation (ongoing monitoring and self assessment)
1302.100, 1302.102(c)(2)(iv)

How does your program use the 4 E's to prevent injuries?

EDUCATION	ENVIRONMENT
ENFORCEMENT	EVALUATION

How does your program use the 4 E's to prevent injuries?

EDUCATION

- Training staff and parents about safety practices
- Educating children about safe behaviors

ENVIRONMENT

- Using safety checks before using any play environment
- Removing all hazards

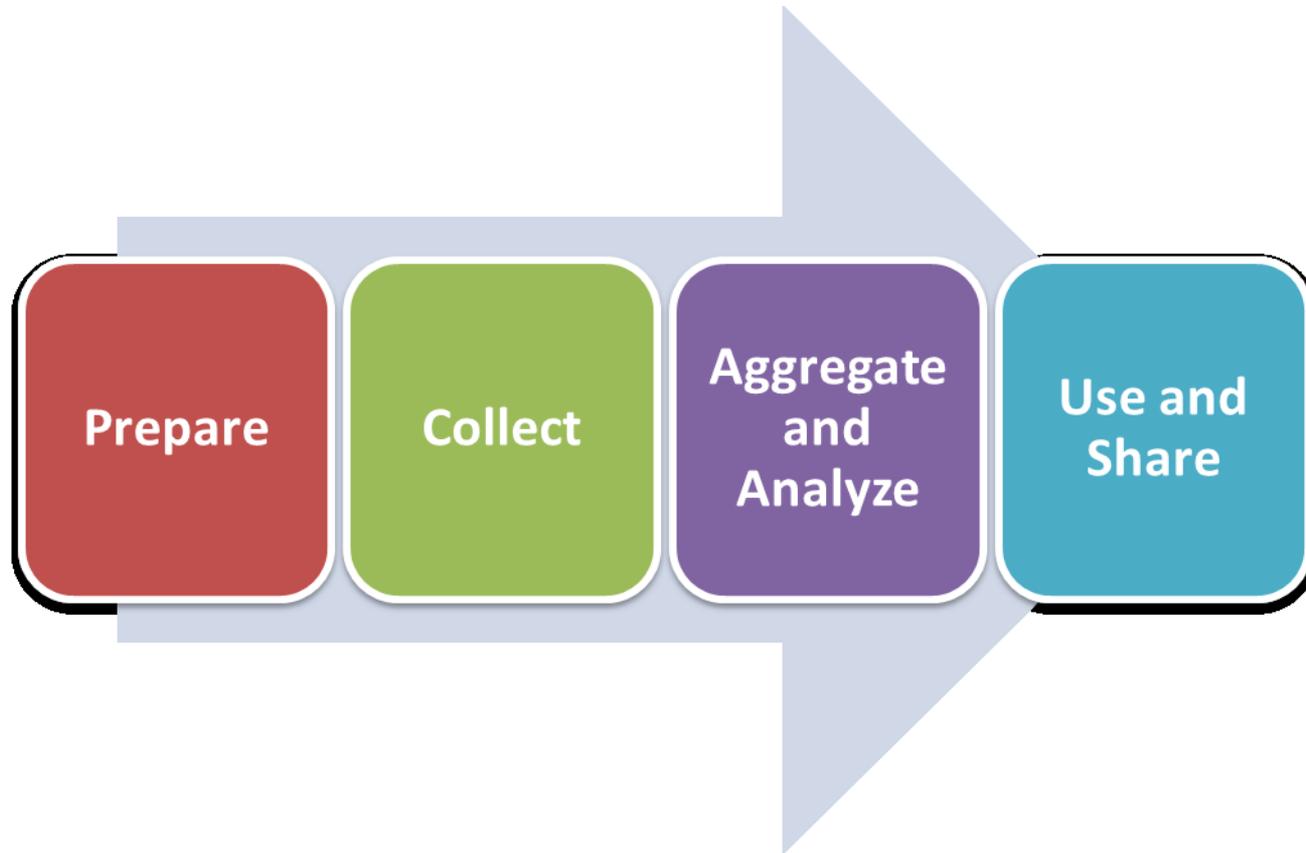

ENFORCEMENT

- Developing program policies to support ongoing safety checks
- Creating program practices to enforce safe practices

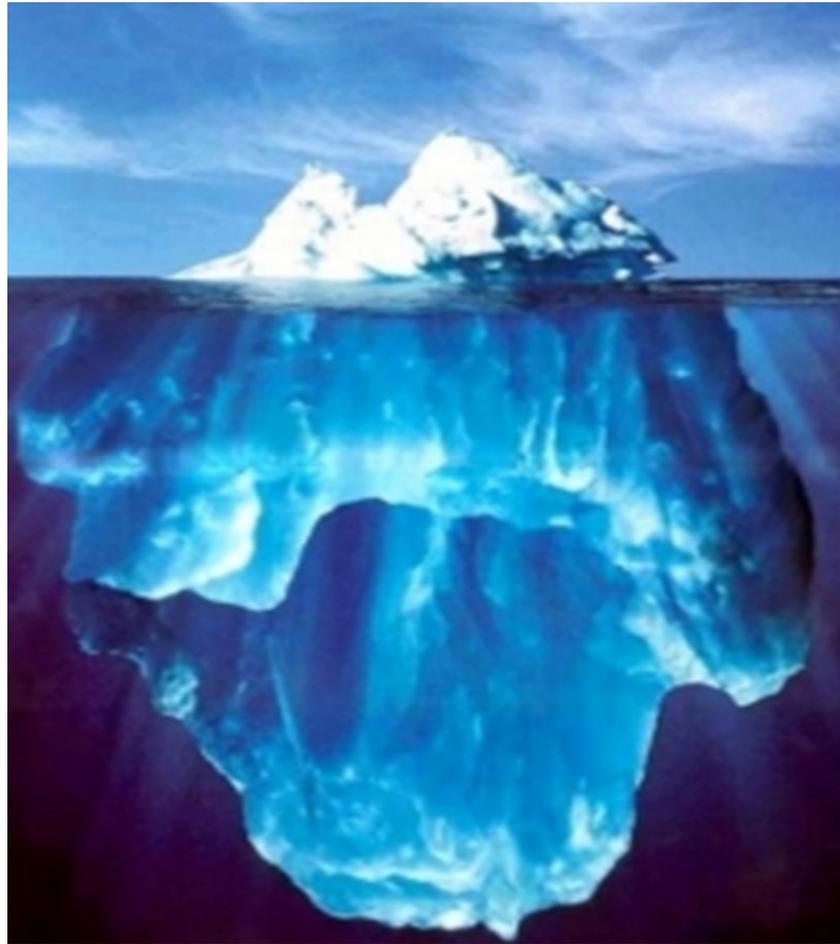

EVALUATION

- Using injury and incident data to plan program improvement
- Using your HSAC or other partners to advise you

Data Activities

Preparing for Data Collection and Collecting Data

How do you plan data collection?

- What are your questions about safety and injury prevention?
- How are your questions connected to your program and school readiness goals?
- What do you need to know to answer your questions?
- What does the data you have tell you?
- How does the data capture observations without judgment?

Data Collection Tools

- Injury and Incident Reports
- Safety Checklists
- Daily Health Checks
- Notes from Family/Parent Meetings
- Case notes (for home visitors)
- Other?

What does the data tell you?

- What hazards does the child encounter?
- How does this process help you aggregate and analyze your data?
- How will you use this data to individualize?

Injury and Incident Report

- Who
- What
- Where
- When
- How

Caring for Our Children: National Health and Safety Performance Standards CC

Incident Report Form

Fill in all blanks and boxes that apply.

Name of Program: _____ Phone: _____

Address of Facility: _____

Child's Name: _____ Sex: M F Birthdate: ___/___/___ Incident Date: ___/___/___

Time of Incident: ___:___am/pm Witnesses: _____

Name of Legal Guardian/Parent Notified: _____ Notified by: _____ Time Notified: ___:___am/pm

EMS (911) or other medical professional Not notified Notified Time Notified: ___:___am/pm

Location where incident occurred: Playground Classroom Bathroom Hall Kitchen Doorway
 Gym Office Dining Room Stairway Unknown Other (specify) _____

Equipment / Product involved: Climber Slide Swing Playground Surface Sandbox
 Trike/Bike Handtoy (specify): _____
 Other Equipment (specify): _____

Cause of Injury (describe): _____
 Fall to surface; Estimated height of fall ___ feet; Type of surface: _____
 Fall from running or tripping Bitten by child Motor vehicle Hit or pushed by child
 Injured by object Eating or choking Insect sting/bite Animal bite Exposure to cold
 Other (specify): _____

Parts of body injured: Eye Ear Nose Mouth Tooth Part of face Part of head
 Neck Arm/Wrist/Hand Leg/Ankle/Foot Trunk Other (specify): _____

First aid given at the facility (e.g. comfort, pressure, elevation, cold pack, washing, bandage): _____

Treatment provided by: _____
 No doctor's or dentist's treatment required
 Treated as an outpatient (e.g. office or emergency room)
 Hospitalized (overnight) # of days: _____

Number of days of limited activity from this incident: _____ Follow-up plan for care of the child: _____

Corrective action needed to prevent reoccurrence: _____

Name of Official/Agency notified: _____

Signature of Staff Member: _____ Date: _____

Signature of Legal Guardian/Parent: _____ Date: _____

Reference: American Academy of Pediatrics, Pennsylvania Chapter, 2002. Model child care health policies, 4th ed. Washington, DC: national Association for the Education of Young Children.
 This form was developed for Model Child Care Health Policies, 2002, by the Early Childhood Education Linkage System (ECELIS), a program funded by the Pennsylvania Dept. of Health & Public Welfare and contractually administered by the PA Chapter, American Academy of Pediatrics.

481 Appendix CC

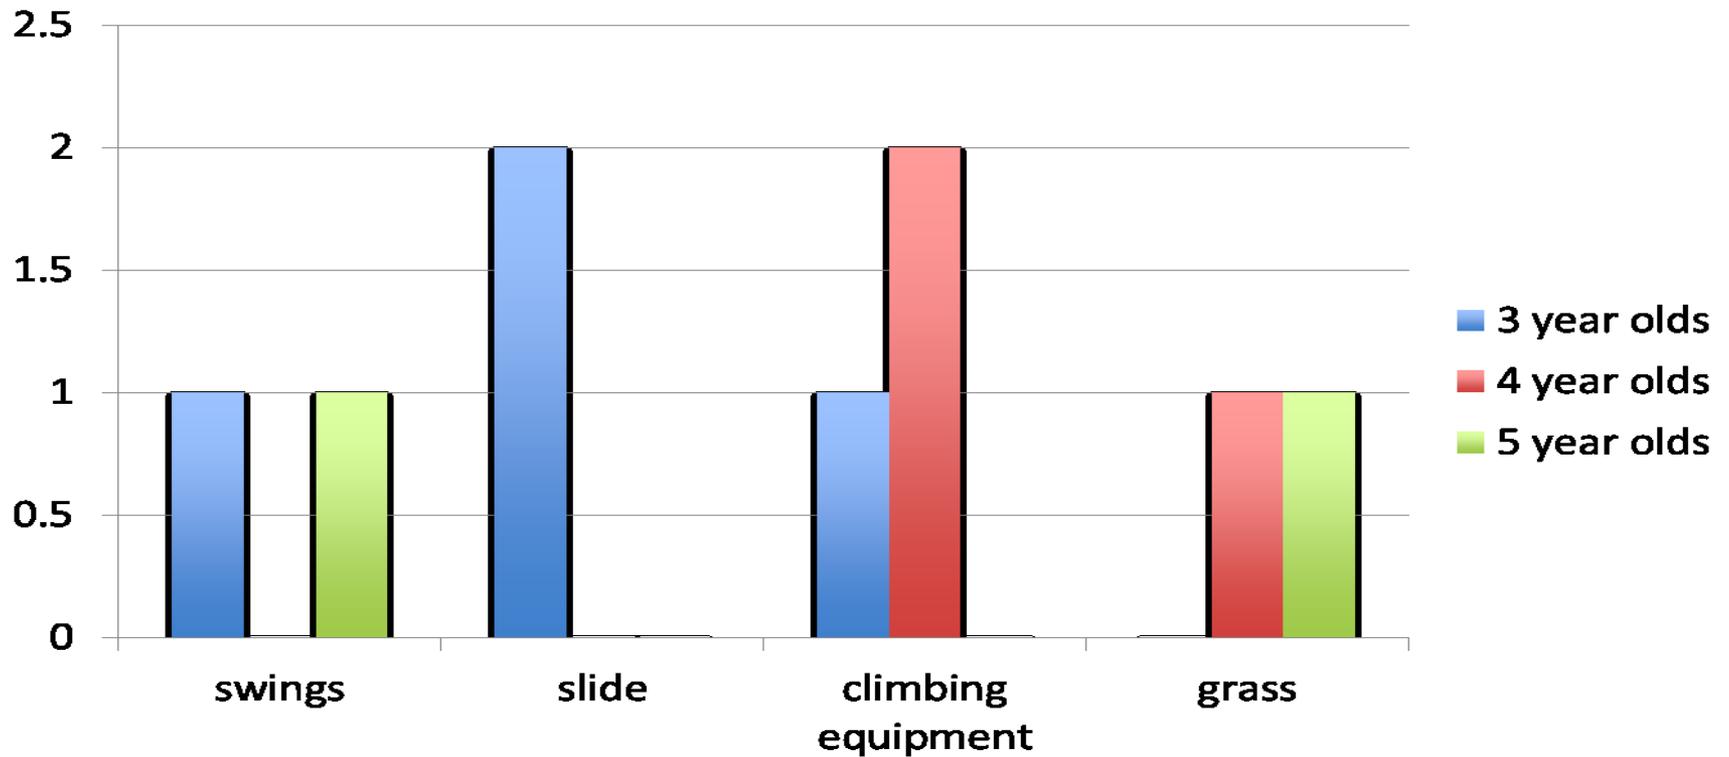

Aggregating and Analyzing Data to Draw Conclusions

Hazard Mapping

1. Identify location(s) for high risk of injury
2. Pinpoint systems and services that need to be strengthened
3. Develop a corrective action plan
4. Incorporate safety and injury prevention into ongoing-monitoring activities

What can you learn?

Number of playground injuries by equipment location and age from 2010 - 2012

Looking at Aggregated Data

Number of Playground Injuries from 2010 - 2012:

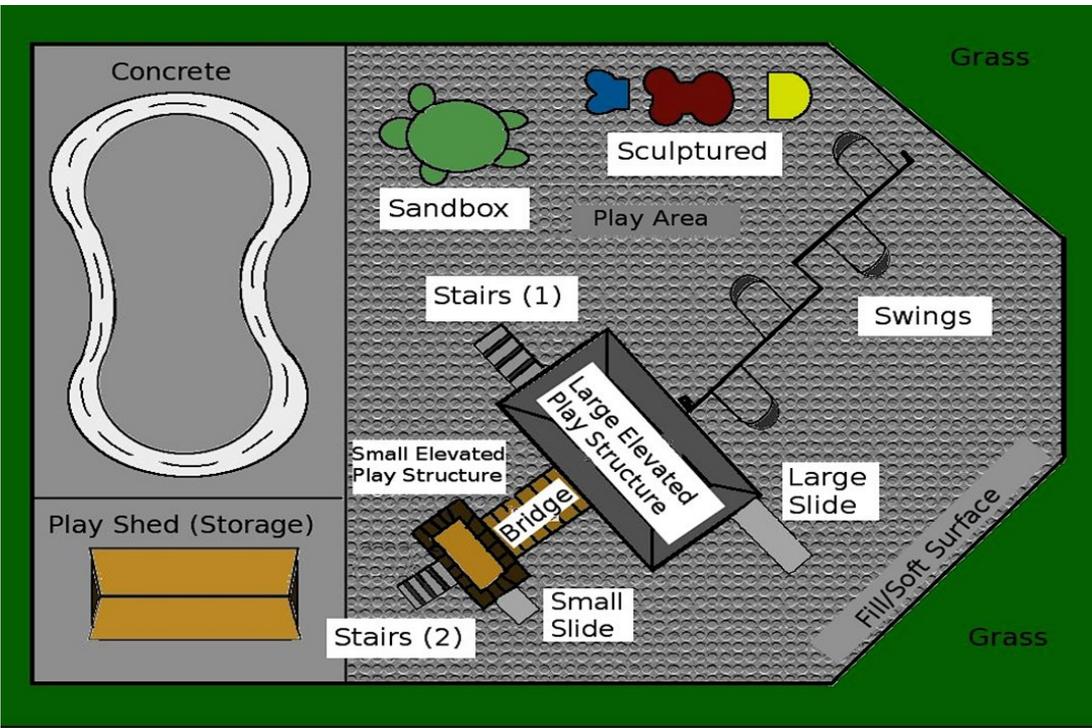

Total: 9

Swings: 2

Slide: 2

Climbing equipment: 3

Grass: 2

Use and Share Data to Improve Program Activities

How Do We Use Injury and Incident Data to Inform Our Practice

We collect data required for compliance

```
graph TD; A[We collect data required for compliance] --> B[We evaluate our staff's skills and knowledge based on data]; B --> C[We review data regularly to determine whether we have to make changes to our policies and procedures]; C --> D[We use our data on an ongoing basis to evaluate our program's systems]; D --> E[We make changes to our program's systems and services based on our analysis of the data];
```

We evaluate our staff's skills and knowledge based on data

We review data regularly to determine whether we have to make changes to our policies and procedures

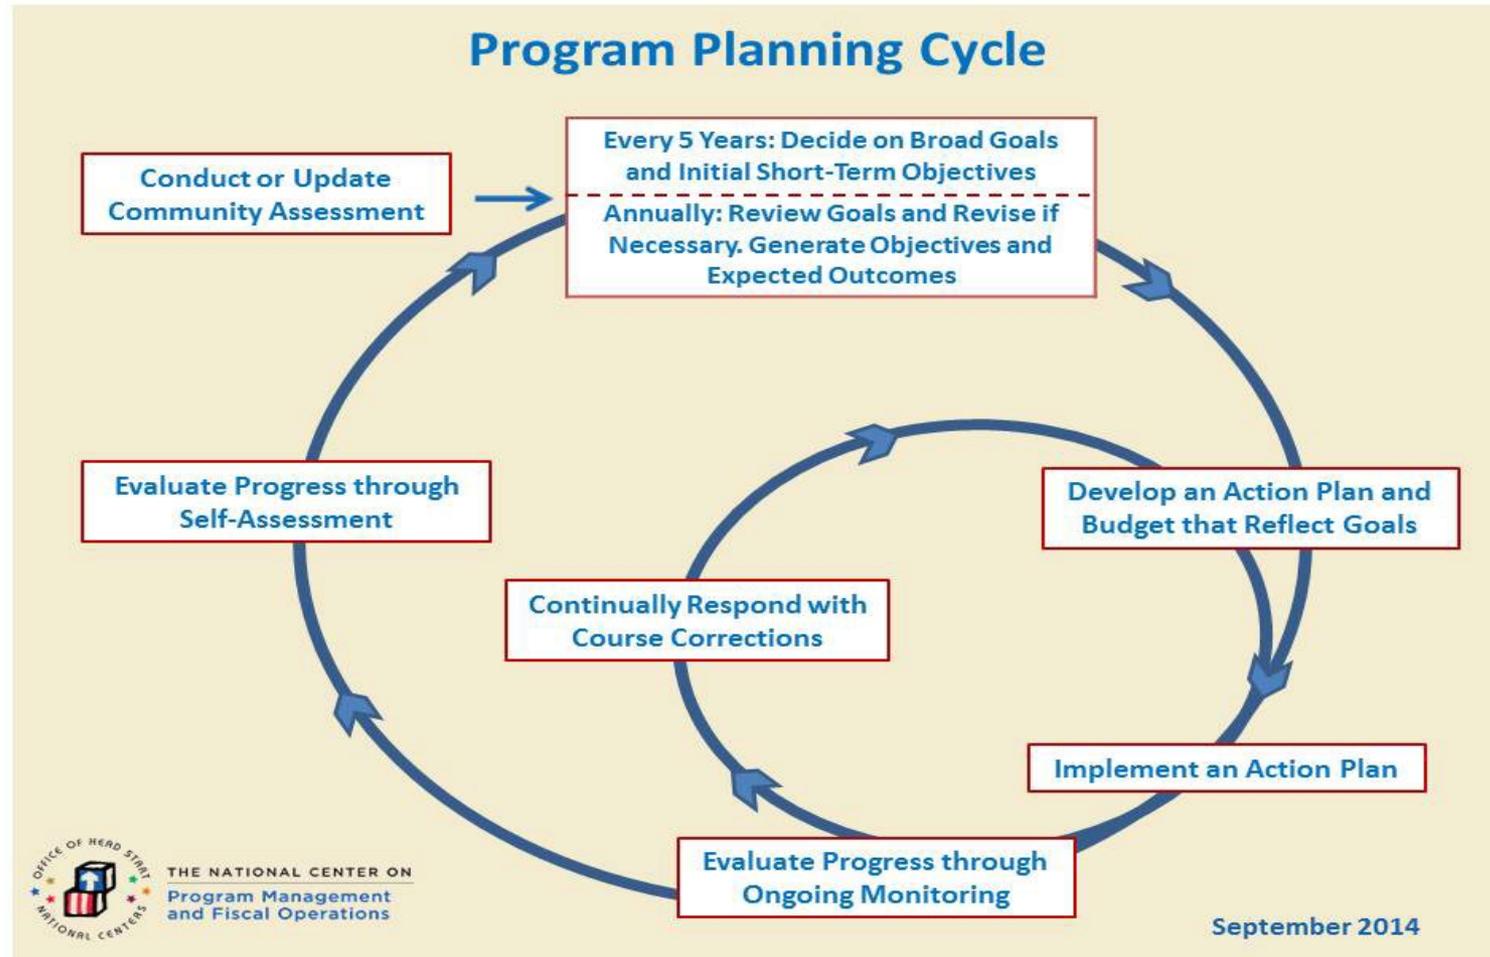

We use our data on an ongoing basis to evaluate our program's systems

We make changes to our program's systems and services based on our analysis of the data

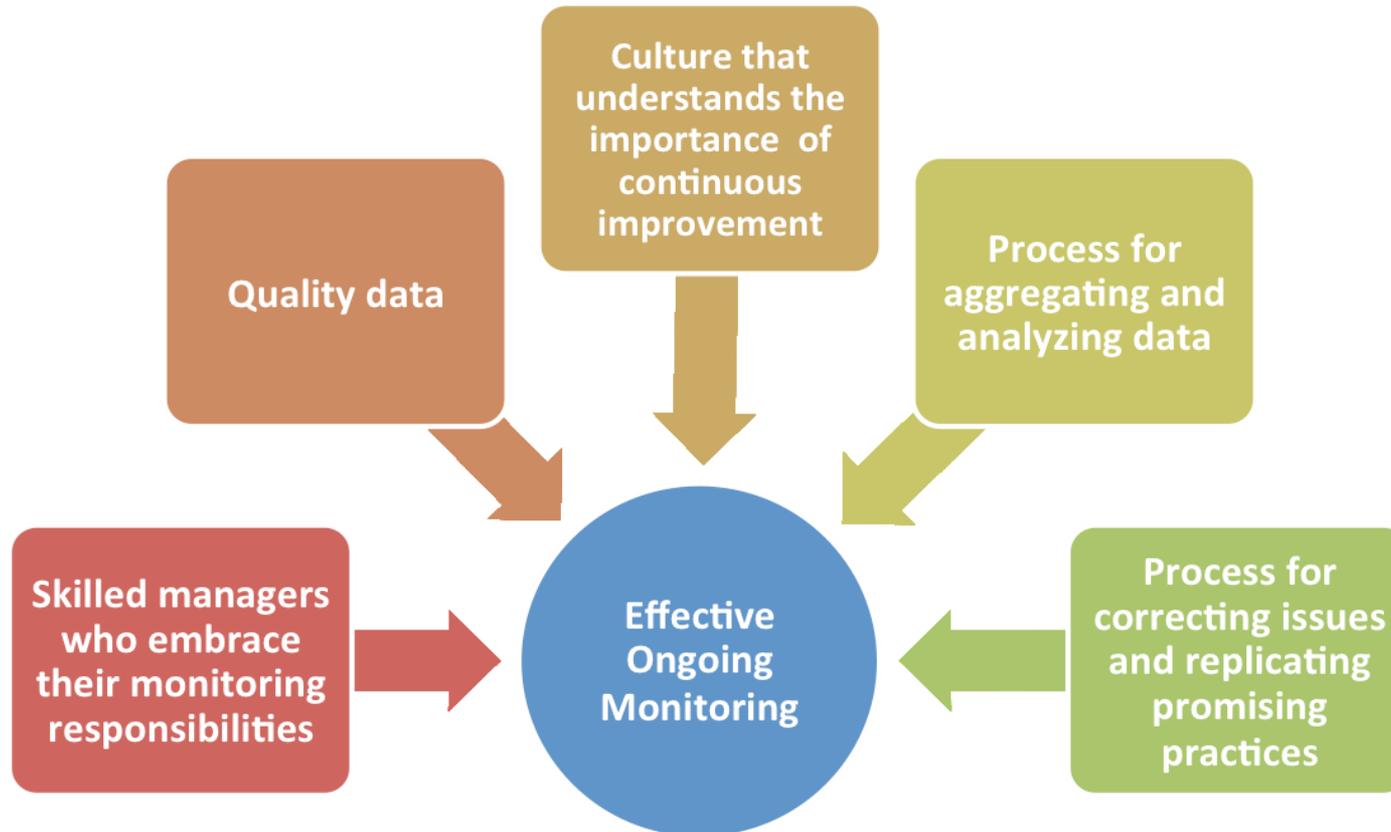

How Do You Share Data?

- Written narratives/reports
- Graphs
- Presentations
- Newsletters/letters
- Other?
